

Having my radio signal from KLOVE displaced by an LPFM broadcasting or other program would be very disturbing to me and my family. KLOVE provides a radio broadcast that is safe for children, there is no fear that they will over hear or pick up something shocking from the news, announcements, etc. KLOVE provides a broadcast that allows children to listen, sing along with, and join in with, without fear of them picking up unwanted language, comments, phrases, etc. KLOVE keeps us well informed and is definitely family friendly and oriented. This radio meets the needs of the whole family from adults to children. The services provided by KLOVE is invaluable and also gives to the public the rare privilege of having a radio station that can be listened to without fear that the DJs will/may say something that is not appropriate for little children. Please do not allow LPFM to take priority over current FM stations, such as KLOVE.
